

# SMS-TORK

SMS TORK started to serve in its sector with the trademark TORK in 1985. We are the first producer of industrial control valves in Turkey. In the second half of 2017, SMS-TORK incorporated with VARNASAN company which was founded in 1976 and has 40 years of experience in the valve manufacturing. With TORK and VARNASAN, our company has expanded its power in fluid control.

With 11 000 meter square factory at IMES OSB and a R&D department, we produce domestic products. Our products are solenoid valves, pneumatic actuators, scotch yoke actuators, pneumatic actuated angle seat valves, pulse valves and electric actuators. Process automation systems design, project planning and start-up service is also provided to our customers. We have served our technology to many industries such as machine builders, chemical, water treatment, cement, concrete, food, HVAC etc.

## Tailor made solutions

On SMS-TORK, we create what you need on your process. One of the hidden heroes behind TORK's success is innovative team. According to market demand, we renew and enhance our product range. In addition to this, we create tailor made solutions. Our R&D team work closely with you for creating the best solution.

In our wide range of products, we create the best solution that fits the most demanding process such as resistance to most aggressive environment or arctic environment.

Quality, reliability and fast delivery times are main points for SMS TORK. Our production and products certified against the latest standards. Thank to our location, we are able

to deliver fastly with the desired quality. Furthermore, with after sales activities,

Today, TORK is preferred by 93 countries. Our goal is to provide the best solution to our customers and ensure benefits to them by creating efficiency and high quality with our products. We thank our customers that support us in our journey on our way towards our destination.
